Addendum # 3
Bid Opportunity: 26-7848-RFT - Waterloo Collegiate Institute HVAC and Exterior Upgrades Phase 2
Closing Date: Thursday, March 26, 2026 2:00 PM

The following issued by the Board shall form part of the Bid / Proposal Solicitation document. The revisions and additions noted herein along with any attachments shall be read in conjunction with all other related documents. This Addendum shall, take precedence over the previously issued documents where differences occur. Receipt of this addendum must be acknowledged in the Bidding System, bids&tenders.

If you have already submitted a Bid / Proposal, it will be automatically withdrawn as a result of this addendum. You must resubmit the Bid / Proposal acknowledging all addenda and revising your Bid / Proposal to comply with all addenda.

Question 1:

On drawing A1.1 there is a demo note 8. Please confirm if this note says we are to repair all firestopping in the room or just at the locations of the existing ducts to

be removed. The entire room wasn't accessible during the walk through due to the existing unit in the room.

Answer 1:

Refer to Sheets A1.1, A1.3, and A1.6, dated 2026.03.26, attached and forming part of this addendum.

Question 2:

The specifications call for Curtain Wall systems, while the drawing details refer to 'Window Assemblies'—even though the details themselves appear to be for Curtain Walls. Consequently, we are assuming W1 through W10 and CW1/CW2 to be Curtain Wall unless otherwise noted

Answer 2:

Refer to Sheet A2.5 dated 2026.03.26, attached, and forming part of this addendum.

Question 3:

Section 10 51 13 identifies Lockers.
Please confirm lockers 18 inches x 18 inches x 72 inches are included within the tender. Please identify location of these locers within drawings.

Answer 3:

<u>Delete</u> Specification, Section 10 51 13 (Page 2 of 4) in its entirety, and <u>Replace</u> with Section 10 51 13 R1, attached hereto and forming part of this addendum. Contractor to site verify locker dimensions. Refer to drawings for locker locations.

Question 4:

On drawing A1.2 demo note 12 can you please confirm the requirements of refinishing the rad cover. Are we just to paint it or is it required to have a powder coating on it?

Answer 4:

Refer to drawing 4/A1.5.

Question 5:

To properly price the firespray required we will need existing drawings for the structural steel.

Answer 5:

Refer to WCI – 1961 Addition Structural drawings, attached, and forming part of this addendum.

Question 6:

On drawings A1.3 it shows existing tiles to be removed, stored and, reinstalled. If the existing tiles are in bad shape will the replacement of them be extra to contract?

Answer 6:

Refer to A1.3, A1.5b, and A1.6, dated 2026.03.23, attached, and forming part of this addendum.

Question 7:

On drawing A4.1 Demo note D3 says reserved but is pointing to all the lights in the corridor.

Answer 7:

Refer to A1.4 dated 2026.03.23, attached, and forming part of this addendum.

Question 8:

Is heat trace cable required for any of the refrigerant or condensate lines.

Answer 8:

Heat tracing is not required on the refrigerant piping or condensate piping

Question 9:

On drawing A2.1 D4 - It is going to be much more cost effective to recap the existing columns then to patch and repair them. Also demo note 10 says to cut existing cover ceiling. The existing condition in this location is a bulkhead in front of the windows, what does the cover ceiling refer to?

Answer 9:

Thank you for the recommendation, but please proceed as per drawings. The Cove Ceiling referenced in the drawings refers to the bulkhead.

Question 10:

On A3.2 - The ceiling is hatched to be removed but no demolition notes are pointing the the corridor ceiling. It also doesn't note that there is to be a new ceiling installed either.

Answer 10:

Refer to all information on Sheet A3.2.

Question 11:

On A5.1 demo note D2 says to keep the existing ceiling. This is an old plaster ceiling that is already partially damaged.

Answer 11:

Refer to Sheet A5.1 and A5.2 dated 2026.03.23, attached, and forming part of this addendum.

Question 12:

There are two E3.1 drawings in the tender package.

Answer 12:

Duplicate sheet E3.1 appears to be a plotting issue. This duplicate drawing is to be removed from the package.

Question 13:

Locker specification 2.4.7 Doors, identifies 27 gauge. Please confirm Inner/outer door panel gaugei. e. 14/20 ga 16/20 ga 14/24 ga. 27 gauge is not listed as a typical locker gauge.

Answer 13:

Delete Specification, Section 10 51 13 (Page 2 of 4 and Page 3 of 4) in its entirety, and Replace with Section 10 51 13 R1 (Page 2 of 4 and Page 3 of 4), attached hereto and forming part of this addendum.

Question 14:

Reference Drawing, A4.1 identifies 1. Exisitng to remain locker bodies, including shelves, exposed interior, exterior. 2. All lockers missing hooks to receive new hooks. 3. New Locker Doors to be installed on all existing locker bodies. The Locker Keynotes, identify Replace Missing Hooks, and Supply new Doors. Under Electratic Painting - identifies Locker bodies to be painted. Please confirm interpretation of Locker Keynotes, Painting, and New Fronts.

Answer 14:

Refer to drawings A4.1 and A4.2 dated 2026.03.23, attached, and forming part of this addendum.

Question 15:

Please confirm location of Commerical Lockers, within drawings. Commercial Locker as noted within Locker Specification.

Answer 15:

Refer to Specification, Section 10 51 13 R1, Page 2 of 4, attached, and forming part of this addendum

<u>Clarification Initiated by the Board/ Consultant</u>

Clarification 1
Due to the absence of a detailed specification for the thermally broken storefront system indicated on drawing S01/ A5.2, please reference a thermally broken system of performance equivalent to the 451UT series to maintain continuity with the building envelope's high-performance thermal requirements, or approved equivalent.

Clarification 2
At this time, the specification for "Section 10 51 13 METAL LOCKERS" remains unchanged. Due to time constraints, alternates request cannot be reviewed as part of this tender and will not be accepted. Alternate products may be considered for future projects at the discretion of the Board.

Clarification 3
Contractors shall carry a Cash Allowance of $20,000.00 for the Door Hardware Finish Schedule, to cover hardware supply and installation associated with the specified openings.

End of Addendum

2 Products

2.1 APPROVED PRODUCTS AND MANUFACTURERS

.1 Basis-of-Design Products: Products named in this Section were used as the basis-of-design for the project; additional manufacturers offering similar products may be incorporated into the work of this Section provided they meet the performance requirements established by the named products and provided they submit requests for substitution in accordance with Division 01.

.2 Subject to compliance with requirements, manufacturers offering products that may be incorporated into the Work include; but are not limited to, the following:

.1 ASI Storage Solutions Inc.

.2 Shanahan's Building Products

.3 GSS (General Storage Systems)

.4 Hadrian Manufacturing Inc.

.3 ~~Commercial Lockers:~~ **Metal Lockers:**

.1 Size: ~~457mm (18”) wide x 457mm (18”) deep x 1829mm (72”) high.~~
305mm +/- (12" +/-) wide x 381mm +/- (15" +/-) deep x 1829mm (72") high

.2 Construction:

.1 Doors: One-piece double wall envelope construction, complete with honeycomb core, welded construction, complete with recessed handle box.

.1 Outer Panel: 16 gauge thick.

.2 Inner Panel: 20 gauge thick.

.2 Frame: Minimum 16 gauge steel channel, welded construction complete with 11 gauge padlock hasp.

.3 Body: Minimum gauge requirements:

.1 Panels: 20 gauge.

.2 Shelves: 16 gauge.

.3 Fillers: 16 gauge.

.4 Bottoms: 16 gauge.

.5 End Panels: 16 gauge.

.6 Bolt Spacing: 229mm o.c. maximum spacing.

.4 Handle: Recessed lock pocket, one piece construction, 20 gauge.

.5 Tops: Sloped, continuous overtop of a bank of lockers, 20 gauge.

.6 Hinge: Continuous, heavy-duty full length 16 gauge piano hinge riveted to both door and frame.

.3 Configuration: Single tier.

.4 Basis of Design Product: SLM Deluxe Series Locker by Shanahan's Building Products.

.1 Acceptable alternate models and manufacturers:

.1 Tradition Plus Collection by ASI Storage Solutions Inc.

.2 Excalibur Locker by General Storage Systems Ltd.

.3 Atlas Institutional Lockers by Anthony Steel Manufacturing.

2.2 MATERIALS

.1 Sheet Steel: Cold rolled carbon steel, commercial quality stretcher levelled or temper rolled to stretcher levelled standard of flatness free from surface imperfections and conforming to ASTM A366/A336M-91.

.2 Locker Paint: Electrostatically applied, thermo-setting, high performance primer and powder coating.

.3 Welding Materials: Conforming to CSA W59.

.4 Fasteners: Non-corrosive type.

.5 Steel Plate: Conforming to CAN/CSA-G40.20/G40.21, Grade 44W.

.6 Chromeplating: Chrome plating on steel by "electroplating" method, with plating sequence as follows; 0.00035" thickness of Copper, followed by 0.00039" thickness of Nickel, followed by 0.00064" thickness of Chromium.

.7 Polyurethane Coating: Oil modified, clear gloss or stain interior type conforming to CAN/CGSB-1.175-M.

2.3 FINISHES

.1 Lockers:

.1 Specially treat metal locker surfaces by phosphate conversion process conforming to CGSB 31-GP-105a, ready to receive locker paint finish.

.2 Electrostatically apply locker paint to all metal locker surfaces. Colours as selected by Consultant from manufacturer's standard product range.

2.4 FABRICATION

.1 General: Make work square, plumb, straight and true. Make joints and intersections tightly fitted and securely fastened.

.2 Finish: All parts to be thoroughly degreased, cleaned and given a bonding, rust-retarding phosphate coat and two finish coats of powder coating. Material then to be baked to produce a hard durable finish.

.3 Body: End sides to have double bend at front edge to add stiffness. Front edge of shelf to be bent to prevent small items from rolling off.

.4 Sloping Tops: Constructed in long lengths, not less than 3658mm. Provide all angle and channel framing required. All fastenings to be concealed. Panels shall be accurately formed free of waves and buckles and set true to line horizontally and vertically.

.5 Filler Panels: Minimum 20 gauge sheet steel, powder coated to match locker colour. Extend filler panels from finished floor to top of sloping top. Top of panel to be same slope as sloping top. Secure panels from inside of lockers.

.6 Door Frames: Vertical members to have three right angle bends to reduce the danger of exposed edges and add strength. Horizontal members to be bent to channel shape of 19mm x 63.5mm x 19mm. Weld parts together to form a strong, rigid unit. Provide two rubber bumpers on lock side of frame approximately 38mm from top and bottom of door.

.7 Doors: Fully enclosed at rear with a flush minimum ~~27~~ 20 gauge thick reinforcing sheet to form a closed box and make a rigid, whip-free unit. Face of door to be free from protruding handles, locks, louvers, etc.

.8 Bases (where concrete bases are not indicated): 18-gage sheet steel, powder coated to match locker colour, 100mm high, complete with top and bottom legs and intermediate vertical steel reinforcement at back.

.9 Commercial Locker Ventilation: Cut slots at top and bottom of each locker to allow air to flow freely in and out of entire locker from bottom to top.

DEMOLITION KEYNOTES

- (X1) REMOVE EXISTING LOUVRES, COMPLETE. DEMOLISH EXISTING MASONRY WALL BETWEEN LOUVRES TO THE WIDTH OF THE UPPER EXISTING LOUVRE OPENING. EXISTING UPPER OPENING LINTEL(S) TO REMAIN IN PLACE. REFER TO STRUCTURAL AND MECHANICAL DRAWINGS. SEE ALSO REFERENCE PHOTO A/A1.1.
- (X2) DISCONNECT AND DEMOLISH EXISTING AIR-HANDLING UNIT (AHU) AND DISPOSE OF FROM SITE AS PER LOCAL REGULATIONS. REFER TO MECHANICAL DRAWINGS FOR FULL SCOPE AS WELL AS PHASING FOR REMOVAL/DEMOLITION.
- (X3) REMOVE EXISTING URINAL AND URINAL CARRIER. REFER TO MECHANICAL DRAWINGS FOR ASSOCIATED DISCONNECT AND SAFE CAPPING OF PLUMBING.
- (X4) DEMOLISH EXISTING HALF WALL AND SLOPED CAP IN THEIR ENTIRETY TO ACCOMMODATE NEW CHASE WALL INSTALLATION.
- (X5) CUT EXISTING TERRAZZO TILE FLOORING. ENSURE CLEAN CUT FOR PATCHING AND REPAIRING. TERRAZZO FINISH WILL BE CUT AN ADDITIONAL AMOUNT AS NEEDED FOR BLOCK WALL CONSTRUCTION ON CONCRETE SLAB. CUT EXISTING FLOOR SLAB, AND POSSIBLE ORIGINAL URINAL PLATFORM, AS REQUIRED FOR DUCT PENETRATION. REFER TO STRUCTURAL AND MECHANICAL DRAWINGS.
- (X6) CAREFULLY REMOVE EXISTING TOILET STALL PARTITIONS & TOILETS FOR STORAGE AND RE-INSTALLATION ONCE CONSTRUCTION IS COMPLETE. REFER TO MECHANICAL DRAWINGS FOR TEMPORARY TOILET DISCONNECT.
- (X7) EXISTING MOP SINK AND ADJACENT PLUMBING FIXTURES TO REMAIN. REFER TO MECH. DWGS. FOR MORE INFORMATION.
- (X8) RESERVED
