Section 2.1 Manufacturers

2.1.1 Equivalent Manufacturers for the work of this sections:

**Add** .5 Aerloc Industries.

**Question 1**

The Room Finish Schedule indicates porcelain tile in the stairwell with rubber treads and risers. However, Drawing A5.00 shows rubber flooring at the mid-landing only. Should rubber flooring also be applied at the upper landing, or is porcelain tile intended at that location?

**Answer 1**

Porcelain tile is intended at the mid-landings as per the room finish schedule taking precedence over drawing A5.00. Porcelain tile intended at the upper stair landing vestibules as well. Rubber treads and risers only.
